

CECW-EE

Manual  
No. 1110-2-1009

1 June 2002

**Engineering and Design  
STRUCTURAL DEFORMATION SURVEYING**

**Table of Contents**

<b>Subject</b>	<b>Paragraph</b>	<b>Page</b>
<b>Chapter 1</b>		
<b>Introduction</b>		
Purpose.....	1-1	1-1
Applicability.....	1-2	1-1
Distribution.....	1-3	1-1
References.....	1-4	1-1
Scope of Manual.....	1-5	1-1
Background.....	1-6	1-1
Deformation Survey Techniques.....	1-7	1-2
Life Cycle Project Management.....	1-8	1-3
Metrics.....	1-9	1-4
Trade Name Exclusions.....	1-10	1-4
Abbreviations and Terms.....	1-11	1-4
Mandatory Requirements.....	1-12	1-4
Proponency and Waivers.....	1-13	1-4
<b>Chapter 2</b>		
<b>Planning, Design, and Accuracy Requirements</b>		
Standards for Deformation Surveys.....	2-1	2-1
Accuracy Requirements for Performing Deformation Surveys.....	2-2	2-2
Overview of Deformation Surveying Design.....	2-3	2-3
Professional Associations.....	2-4	2-7
Causes of Dam Failure.....	2-5	2-8
Foundation Problems in Dams.....	2-6	2-8
Navigation Locks.....	2-7	2-10
Deformation Parameters.....	2-8	2-11
Location of Monitoring Points.....	2-9	2-12
Design of Reference Networks.....	2-10	2-13
Reference Point Monumentation.....	2-11	2-17
Monitoring Point Monumentation.....	2-12	2-19
Design of Measurement Schemes.....	2-13	2-21
Measurement Reliability.....	2-14	2-23
Frequency of Measurements.....	2-15	2-25
Mandatory Requirements.....	2-16	2-27

Subject	Paragraph	Page
<b>Chapter 3</b>		
<b>Deformation Measurement and Alignment Instrumentation</b>		
General.....	3-1	3-1
Angle and Distance Measurements.....	3-2	3-2
Differential Leveling.....	3-3	3-6
Total Station Trigonometric Elevations.....	3-4	3-7
Global Positioning System (GPS).....	3-5	3-7
Photogrammetric Techniques.....	3-6	3-11
Alignment Measurements.....	3-7	3-12
Extension and Strain Measurements.....	3-8	3-14
Tilt and Inclination Measurements.....	3-9	3-16
Non-Geodetic Measurements.....	3-10	3-18
Optical Tooling Technology.....	3-11	3-20
Laser Tooling methods.....	3-12	3-21
Laser Alignment Technology.....	3-13	3-22
Laser Alignment Techniques.....	3-14	3-25
Laser Alignment Error Sources.....	3-15	3-27
Laser Beam Propagation.....	3-16	3-29
Laser Alignment Equipment.....	3-17	3-31
Current Laser Alignment Surveys		
--Libby and Chief Joseph Dams, Seattle District.....	3-18	3-34
Suspended and Inverted Plumblines.....	3-19	3-38
Comparison of Alignment and Plumblines.....	3-20	3-39
Tiltmeter Observations.....	3-21	3-41
Mandatory Requirements.....	3-22	3-42
<b>Chapter 4</b>		
<b>Sources of Measurement Error and Instrument Calibrations</b>		
Surveying Measurement Errors.....	4-1	4-1
Optical Pointing Error.....	4-2	4-2
Instrument Leveling Error.....	4-3	4-4
Instrument Centering Error.....	4-4	4-5
Horizontal Angle Measurement Error.....	4-5	4-7
Electronic Distance Measurement Error.....	4-6	4-7
Zenith Angle Measurement Error.....	4-7	4-9
Refraction of Optical Lines of Sight.....	4-8	4-10
Theodolite System Error.....	4-9	4-15
Reflector Alignment Error.....	4-10	4-15
EDM Scale Error.....	4-11	4-15
EDM Prism Zero Error.....	4-12	4-16
EDM Cyclic Error.....	4-13	4-18
Calibration Baselines.....	4-14	4-18
Equipment for Baseline Calibration.....	4-15	4-20
Procedures for Baseline Calibration.....	4-16	4-20
Mandatory Requirements.....	4-17	4-22

Subject	Paragraph	Page
<b>Chapter 5</b>		
<b>Angle and Distance Observations--Theodolites, Total Stations and EDM</b>		
Scope.....	5-1	5-1
Instrument and Reflector Centering Procedures .....	5-2	5-1
Angle and Direction Observations .....	5-3	5-3
Distance Observations.....	5-4	5-5
Electro-Optical Distance Measurement .....	5-5	5-7
EDM Reductions .....	5-6	5-10
Atmospheric Refraction Correction.....	5-7	5-10
Mandatory Requirements .....	5-8	5-14
<b>Chapter 6</b>		
<b>Settlement Surveys--Precise Differential Leveling Observations</b>		
Scope.....	6-1	6-1
Precise Geodetic Leveling.....	6-2	6-1
Differential Leveling Reductions .....	6-3	6-5
Total Station Trigonometric Heights .....	6-4	6-7
Mandatory Requirements .....	6-5	6-7
<b>Chapter 7</b>		
<b>Alignment, Deflection, and Crack Measurement Surveys--Micrometer Observations</b>		
Scope.....	7-1	7-1
Relative Alignment Deflections from Fixed Baseline .....	7-2	7-1
Micrometer Crack Measurement Observations.....	7-3	7-5
Mandatory Requirements .....	7-4	7-11
<b>Chapter 8</b>		
<b>Monitoring Structural Deformations Using the Global Positioning System</b>		
Purpose.....	8-1	8-1
Background.....	8-2	8-1
Scope of Chapter.....	8-3	8-2
<b>Section I</b>		
<b>Monitoring Structural Deformation with GPS</b>		
Surveying Requirements .....	8-4	8-3
Surveying Procedures .....	8-5	8-5
Data Processing Procedures .....	8-6	8-8
GPS Monitoring Applications .....	8-7	8-10
GPS Survey Reporting and Results .....	8-8	8-14

Subject	Paragraph	Page
<b>Section II</b>		
<b>GPS Performance on Monitoring Networks</b>		
Principles of GPS Carrier Phase Measurement.....	8-9	8-15
GPS Receiving System Performance .....	8-10	8-18
Sources of Error in GPS Measurements .....	8-11	8-21
GPS Performance on Monitoring Networks .....	8-12	8-23
<b>Section III</b>		
<b>Data Quality Assessment for Precise GPS Surveying</b>		
Quality Assessment Tools .....	8-13	8-28
GPS Session Status .....	8-14	8-29
Data Post-Processing.....	8-15	8-31
Post-Processing Statistics .....	8-16	8-33
Closure and Station Checks .....	8-17	8-36
<b>Section IV</b>		
<b>GPS Multipath Error</b>		
Description of Multipath Signals.....	8-18	8-38
Data Cleaning Techniques for GPS Surveys .....	8-19	8-40
Mandatory Requirements .....	8-20	8-42
<b>Chapter 9</b>		
<b>Preanalysis and Network Adjustment</b>		
General.....	9-1	9-1
Theory of Measurements.....	9-2	9-1
Least Squares Adjustment .....	9-3	9-3
Adjustment Input Parameters .....	9-4	9-5
Adjustment Output Parameters.....	9-5	9-10
Adjustment Procedures .....	9-6	9-16
Sample Adjustment--Yatesville Lake Dam.....	9-7	9-19
Mandatory Requirements .....	9-8	9-31
<b>Chapter 10</b>		
<b>Relative Distance Ratio Assessment Methods</b>		
Introduction.....	10-1	10-1
Deformation Monitoring Using Ratio Methods .....	10-2	10-4
Mandatory Requirements .....	10-3	10-16

Subject	Paragraph	Page
<b>Chapter 11</b>		
<b>Analysis and Assessment of Results</b>		
General.....	11-1	11-1
Geometrical Analysis.....	11-2	11-2
Statistical Modeling.....	11-3	11-6
Deterministic Modeling.....	11-4	11-7
Hybrid Analysis Method.....	11-5	11-8
Automated Data Management.....	11-6	11-9
Scope of Deformation Analysis.....	11-7	11-11
Mandatory Requirements.....	11-8	11-11

**Chapter 12**  
**Data Presentation and Final Reports**

Report Format.....	12-1	12-1
Displacement Data Presentation.....	12-2	12-3
Data Management.....	12-3	12-3
Mandatory Requirements.....	12-4	12-4

**Appendix A References**

**Appendix B Applications: Deformation Surveys of Locks and Dams**

**Central & Southern Florida Flood Control Project  
(Jacksonville District)**

**Surveying for Lock Structure Dewatering  
(Lock and Dam No. 4, St. Paul District)**

**Appendix C Applications: Monitoring Schemes for Concrete Dams  
(Libby Dam, Seattle District)**

**Glossary**
